

The Beechcraft 1900 Beechliner is a 19-passenger, pressurized twin-engine turboprop airplane designed to carry passengers in all weather conditions from airports with relatively short runways for distances of more than 600 miles.

Manufactured by the Beechcraft Division of the Raytheon Company (now Hawker Beechcraft) it was designed as and is primarily used as a regional airliner. It is also used commercially as a freight aircraft and for corporate transport.

In terms of the number of aircraft built and its continued use by many passenger airlines and other users, it is the most successful 19-passenger airliner in history.

Type of Aircraft	Beech 1900D
Operator	Zimex Aviation
Active Fleet	1
Length (m)	17.6
Wingspan (m)	16.6
Height (m)	4.5
Cabin Width (m)	1.22
Cabin Length (m)	7.05
Cabin Height (m)	1.78
Cabin Configuration	Pax / Cargo
Cargo Door	134x137cm
Cargo Volume (m3)	18
Max. Take-off Weight (kg)	7765
Max. Payload (kg)	1950
Engines	Pratt & Whitney Canada PT6A-67D
Cruising Speed (km/h / kts)	464 / 250
Fuel Consumption	307 l/h
Max. Range	1700 km
